## **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply to the examination of this application the application being examined was not (1) filed before November 29, 2000, or (2) voluntarily published under U.S.C. 122(b). Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 13 to 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Wessel et al (AM) or Fortune et al (AO). Wessel et al disclose that ICRR-187 (bisdioxopiperazine) inhibits topoisomerase II without stabilizing the cleaved form as a covalent complex. The disclosed mechanism is different from the proposed herein, but is not relevant to the rejection. Fortune et al disclose that merbarone inhibits topoisomerase by blocking DNA cleavage.

Application/Control Number: 09/912,483

Art Unit: 1614

Claims 13 to 15 are rejected under 35 U.S.C. 102(e) as being anticipated by Davies et al (AA) which disclose compounds with the structure of formula (Ia) as antibacterials. Although Davies et al do not set the mechanism of action forth, the compounds are identical to those instantly claimed and inherently inhibit by the same mechanism as instantly claimed.

Claims 13 to 15 are rejected under 35 U.S.C. 102(e) as being anticipated by Coates et al (AB) or Hatton et al(AC). Both references disclose compounds with the structure of formula (Ia) as antibacterials. Although the mechanism of action is not set forth by Coates et al (AB) or Hatton et al(AC), the compounds are identical to those instantly claimed and inherently inhibit by the same mechanism as instantly claimed.

## Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references cited by applicants' are made of record.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James H. Reamer whose telephone number is (703) 308-4461. The examiner can normally be reached on 5:30 AM to 2:00 PM Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marianne Seidel can be reached on (703) 308-4725. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9306 for regular communications and (703) 872-9307 for After Final communications.
